Education :

Bachelor of Science in Computer Science (B.Sc.)
University of Haifa, Graduation Year: April 2024

Professional Experience :

System Monitoring Engineer.

Yahoo!, Ramat Gan, Israel

August 2021 – December 2023

- Managed and maintained system operations, ensuring high availability and reliability.
- Developed and implemented various system monitoring dashboards to track performance and uptime.
- Utilized analytical skills to debug issues and provide production solutions using leading project management platforms.

Freelance Web Developer (Non-Profit).

Since University – Present:

- Designed, developed, and deployed web applications for a non-profit network of family and friends.
- Implemented technologies such as CSS, HTML, React, JavaScript, jQuery, Bootstrap, and more to create user-friendly websites.

Technical Skills:

- Programming Languages: Java, JavaScript, React, HTML, CSS, SQL (various dialects), Bash, Python, C, C++, Assembly, Git, PHP.
- Operating Systems: Linux, Windows, Android, iOS (basic).
- Big Data and Cloud: AWS EC2, AWS S3, MongoDB, Hadoop, Google Cloud Platform
- Web Development: HTML, CSS, React, Angular, Bootstrap, Node.js, Express.js
- Databases: MySQL, SQLite, MongoDB, HDFS, Google Drive
- Version Control: Git, GitHub
- Other Tools: Screwdriver, Kubernetes, industry-specific software and technologies
- Additional Skills: Continuous Integration/Continuous Deployment (CI/CD), Agile methodologies, JIRA

Projects:

- **Final Project:** Groceries and Food Delivery App
Co-developed a multi-role (Admin, User, Driver) delivery application using React, AWS EC2, S3, MongoDB, SQL, and Express.
Integrated Google APIs and other advanced technologies to enhance functionality and user experience.
- **Personal Projects:**
 1. Personal Project 1
Developed using Node.js, React, Bootstrap, HTML, CSS, JavaScript, AWS EC2, S3, SQLite3, Google Drive, and GitHub Io.
 2. Personal Project 2
Created with Java, React, Node.js, Bootstrap, and AWS S3.
 3. Personal Project 3
Utilized Google Drive, cryptographic Python libraries, Bash, and extensive Python for image processing and data manipulation.

Courses:

- DevOps Course, INT Open University.
- Full Stack Development Course, Tsofen.
